134 Deaths

SITUATIONAL AWARENESS

- Dr. Deborah Birx, member of the White House COVID-19 task force stated that based on www.healthdata.org projections, mortalities for Oakland and Wayne counties are expected to peak within a few days to a week.
- Governor Whitmer has partnered with professional sports teams such as the Detroit Tigers and Lions to encourage health care professionals nationwide to volunteer their skills to help Michigan.
- While social distancing guidelines remain crucial, the Centers for Disease Control and Prevention (CDC) is recommending people wear cloth face coverings in public settings such as grocery stores and pharmacies.
- The U.S. Department of Agriculture has announced that a tiger at Bronx Zoo in New York City tested positive after having developed a dry cough and loss of appetite. This is the first known case of animal becoming sick with COVID-19 from human transmission. Six other tigers are also exhibiting symptoms but have not been tested. They are all under veterinary care and are expected to recover.
- Ford Motor Company has shipped 1,000,000 face shields to New York City. Ford stated that it is producing a face shield every 10 seconds and expects to ship 750,000 face shields weekly across the country.
- Ten days after testing positive, the United Kingdom Prime Minister Boris Johnson has been hospitalized as a precautionary measure.

ACTIONS TAKEN

- The Public Health Emergency Operations Center (PHOC) is at FULL ACTIVATION.

STRESS & COPING

Disaster Distress Helpline: 1-800-985-5990

National Domestic Violence Hotline: 1-800-799-7233 and TTY 1-800-787-3224

The outbreak of coronavirus disease 2019 (COVID-19) may be stressful for people. Fear and anxiety about a disease can be overwhelming and cause strong emotions in adults and children. Coping with stress will make you, the people you care about, and your community stronger.

Everyone reacts differently to stressful situations. How you respond to the outbreak can depend on your background, the things that make you different from other people, and the community you live in.

Stress during an infectious disease outbreak can include

- Fear and worry about your own health and the health of your loved ones
- Changes in sleep or eating patterns
- Difficulty sleeping or concentrating
- Worsening of chronic health problems
- Increased use of alcohol, tobacco, or other drugs
