COVID-19 OUTBREAK

SITUATION REPORT - 40.1

APRIL 1, 2020

For Operational Period: March 31, 2020

WORLDWIDE

874,615 Confirmed
43,430 Deaths

UNITED STATES

188,639 Confirmed
4,059 Deaths

MICHIGAN

7,615 Confirmed
259 Deaths

OUT-WAYNE COUNTY

1,707 Confirmed
45 Deaths

SITUATIONAL AWARENESS

- Michigan has received 400 ventilators from the Strategic National Stockpile (SNS). The ventilators will be distributed to hospitals in need across the state. The state will continue working to obtain more.
- Governor Whitmer signed Executive Order 2020-32, temporarily restricting non-essential veterinary services.
- A recent study from Michigan Medicine revealed that social distancing is crucial in helping flatten the curve and it may reduce the amount of COVID-19 patients at U of M hospitals by 65%.
- Chris Cuomo, CNN anchor and brother of New York Governor Andrew Cuomo, has tested positive. Chris stated he has had fever, chills, and shortness of breath and will self-quarantine in his home.
- The Michigan Department of Education will request a statewide federal waiver for Child Nutrition Programs to ensure that eligible children continue to receive access to essential nutrition.

ACTIONS TAKEN

- The Public Health Emergency Operations Center (PHOC) is at FULL ACTIVATION.

STRESS & COPING

Need Help? Know Someone Who Does?

Contact the National Domestic Violence Hotline

Call 1-800-799-7233 and TTY 1-800-787-3224

The outbreak of coronavirus disease 2019 (COVID-19) may be stressful for people. Fear and anxiety about a disease can be overwhelming and cause strong emotions in adults and children. Coping with stress will make you, the people you care about, and your community stronger.

Everyone reacts differently to stressful situations. How you respond to the outbreak can depend on your background, the things that make you different from other people, and the community you live in.

Stress during an infectious disease outbreak can include

- Fear and worry about your own health and the health of your loved ones
- Changes in sleep or eating patterns
- Difficulty sleeping or concentrating
- Worsening of chronic health problems
- Increased use of alcohol, tobacco, or other drugs
